Split two tablespoons per day, supplementing the normal ration based on hay. We recommend to make always available good hay and water.

ECOLOGICAL COCONUT FIBRE LITTER FOR CATS AND SMALL ANIMALS

It is 100% natural, made only with vegetable fibre. It is ideal for the health and hygiene of pets because it is always dry and easy to maintain. Ideal to keep at home, it absorbs odors.

It is NOT palatable for animals.

USE

Spread the fibre evenly in the box, cage or terrarium glass case, in accordance with the specified quantities. If necessary, moisten the coconut bed by spraying water onto it. For best results, remove the manure and leave the fibre outdoors. After use, it can be a great compost or it can be disposed with organic waste.
